

# MARTIN SCHEMKES

## **Brand Director**

Delphia boats promise a new way of cruising in inland waters and at sea: calm, aware, respectful of the environment and of others.

Agreeing to slow down means giving yourself the opportunity to gain in serenity, to live more intensely the moments spent on the water. It is a desire that we sense in some people, and one that goes hand in hand with greater ecological awareness.

The development of electric engines, the introduction of new, more sustainable materials, the constant concern to control the environmental impact of boating, minimised energy consumption thanks to an optimised hull shape and reduced cruising speed are our first responses to the new expectations of these customers"

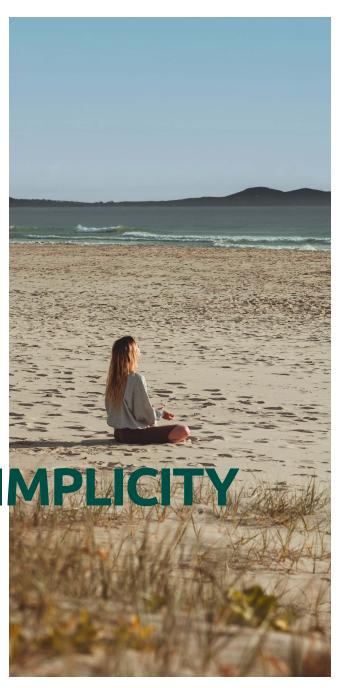

We believe that deceleration is the key to enjoyable and relaxing cruising on inland waterways and at sea. That is why we give owners and passengers the opportunity to enjoy moments of pleasure on boats designed for comfort, convenience and ease of use. Our teams are constantly looking for innovations and more durable materials to give you the best possible cruising experience.

Inspired by nature, Delphia aims to offer its customers an unprecedented level of relaxation on board, characterised by the use of intelligent solutions and sustainable materials. At Delphia, we call this 'Mindful Cruising'.

# ADVANCED SIMPLICE

We believe in advance simplicity and peaceful cruising. Embark on a voyage though to make your life onboard easier. From safety to ergonomics, our boats are crafted to live an experience in complete serenity.

# COLLECTION

# DELPHIA 10 LOUNGE

# The ultimate urban getaway

The Delphia 10 Lounge is designed to bring you moments of harmony from the heart of the city to the surrounding countryside...

With its displacement hull, it glides silently through canals and inland waters and along sheltered coastal areas. It allows you to get up close and personal with the local wildlife and to enjoy a calm and serene environment.

Designed for sharing special moments with loved ones, the Delphia 10 Lounge can accommodate up to twelve people thanks to generous and clever main deck layout. Its interior spaces reveals a bright owner's cabin as well as a guest cabin or an office

and an outstanding bathroom including a shower room. The perfect layout for relaxing voyage over several days.

To make your stay as comfortable as possible, the boat has plenty of storage space and a large rear platform that can safely accommodate and recharge up to 2 electric bikes.

The Delphia 10 Lounge offers two propulsion systems: combustion or electric (Torqeedo) which is ideal for urban cruising. The Delphia 10 Lounge guarantees a unique, relaxing experience, with considerable range for exploring the city's canals or getting away from it all in the fresh air.

You can cover more than 1.600 km on a full diesel tank or more than 228 km with full battery capacity (76kWh) at cruising speed of 8 km/h.

# DELPHIA 10 SEDAN

# The boat for all your family cruises

The Delphia 10 Sedan is an invitation for a retreat on the water. This boat promises great family outings during long stays on the water, with an exceptional quality of life on board and preserved privacy.

Behind the spacious helm station offering a 360° panoramic view, the captain can operate the boat single-handed. With an ergonomic positioned steering wheel, an engine throttle and thruster controls combined with a sliding side door and a hull exit door, the navigation and docking become simple and safe.

Inside, the 2 cabins and bathroom are offering an ample space and are bathed in natural light thanks to the large hull portlights positioned close to the

water level. An additional version is available with one cabin and an office, offering workspace for children and parents.

Design choices such as warm materials, a large salon, a well-equipped galley and plenty of storage space create a cosy and welcoming atmosphere.

Powered by a diesel or an electric engine, the Delphia 10 Sedan invites you to enjoy a peaceful and stress-free cruising with an ability to pass under most of the bridges with ease.

The boat is equipped with a bike rack, allowing you to easily explore the coast while your boat recharges.

Natural light has many benefits for our health, such as increasing vitamin D, helping to improve our metabolism, and improving sleep.

# **ELECTRIC CONCEPT**

Performances: DELPHIA 10 models

Can you imagine cruising in complete silence?
Can you imagine breathing clean air?
Can you imagine being part of a better future?

With their three performance systems, our electric motors offer the possibility to navigate more eco-responsibly and consciously. At Delphia, we call it Mindful Cruising.

\*All data are based on sea trials in MLC condition, flat seas, no wind, sea and outside temperature below 10° celsius and may vary due to water density and type of propeller

"Life" represents a first step in Delphia's conscious boating for boaters who use their boats in limited boating areas, such as lakes, urban areas or who tend to enjoy short cruises or day trips.

# **FLYLOUNGE**

### Travelling in complete privacy

The Delphia 12 FlyLounge is the ideal boat for intimate cruises that encourage relaxation and reconnection.

This boat is for lovers of comfortable travel. A real house on the water, its set up ensures privacy. Designed for pleasant stays, the interior of the cockpit is bathed in light and offers a 360° view, while the exterior allows you to move freely from the sun deck to the bar.

The fully-equipped galley encourages sharing, from preparation to tasting. The two cabins have plenty of storage space, so you can bring along the wardrobe you need for every occasion.

Equipped with one or two engines, the FlyLounge offers the very best in low-speed cruising and maximize on-board comfort. Designed in B category, it can go at sea and along the cost.

When cruising on canals and rivers, be sure to ask about the size of bridges upstream, the flybridge increasing air draft.

« Her size and attention to details are impressive and sets new standards in her class »

The engines installed in the Delphia 12 are among the cleanest diesel engines in the market, with posibility of running on HVO biofuels and emissions low enough to be authorised for cruising on Lake Constance.

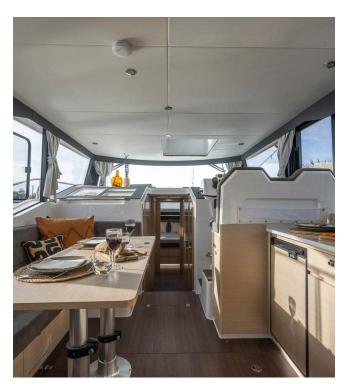

Being environmentally aware is not just about the environment, it's also about people's well-being. It's a way of thinking and acting, and a principle that must guide us.

### **ENGINES**

Our electric propulsion system has a very positive carbon footprint, as it creates no pollution of any kind, is silent and produces no heat or fuel smells. We have carefully chosen our partner for our thermic propulsion system: Yanmar, whose diesel engines comply with the latest emissions regulations and standards.

### **ELECTRICITY**

Thanks to the clean, emission-free energy produced by the solar panels, we offer a renewable source of electricity on board. We chose LED lights for our boats because they consume almost 5 times less energy than ordinary lights.

### MATERIALS

For our boats, we have chosen a synthetic deck material rather than traditional tropical hardwoods. This particular material is an excellent alternative for minimising our environmental footprint and is easy to recycle. Our balsa wood is biodegradable and comes from sustainable plantations, responsibly managed with environmentally friendly harvesting and processing. The wood used for the on-board furniture comes from certified forests that respect biodiversity as much as possible. This allows us to fully control the supply chain and ensure product traceability.

### **FABRICS**

We have chosen to use as many recycled fibres, yarns and fabrics as possible to reduce waste.

### WASTE MANAGEMENT

On board, you will find large tanks for water and waste, so you can dispose of your rubbish when you are docked.

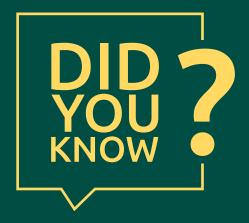

### TO FIND OUT MORE

We encourage e-mobility by installing a charging point for electric bikes on our boats.

## OUR PARTNERS

At cruising speed, our Delphia are quieter than a dishwasher.

### **SIMRAD**°

#### A NEW CHAPTER IS ABOUT TO BEGIN IN DELPHIA HISTORY, AND TRUSTED PARTNER SIMRAD YACHTING IS PROUD TO BE PART OF THE ADVENTURE.

Simrad yachting creates high performance marine electronics that can be relied upon in any situation, which is why Simrad is the brand of choice for a wide range of discerning customers. When you are on the water, the equipment you use can make all the difference, which is why Simrad yachting offers a complete portfolio of precise and responsive technologies for a truly integrated experience. With their high-performance electronics, Simrad yachting lets you achieve your goals like no other.

### WE CREATE THE FUTURE OF HOW PEOPLE MOVE ON THE WATER

As pioneers in the field of on-water electromobility, Torqeedo has set many standards since its inception, reinforcing the lead of its motors over all other propulsion solutions available on the market. Torqeedo offers outboard and inboard motors, electric motors and hybrid drive systems from 0.5 to 100 kW at motor level (up to 200 kW at system level).

### YANMAR HAS LONG HAD A CLOSE RELATIONSHIP WITH THE SEA.

For more than a century, Yanmar has shared the beauty of the sea with its customers. As a leading supplier of marine engines for industry and leisure, Yanmar is committed to providing the highest quality equipment that delivers superior performance and value over its lifetime, with minimal impact on the environment.

The Seanapps mobile application and its on-board unit offer a host of features for an optimal navigation experience.

You can use your smartphone to consult information such as battery charge status, water tank levels and upcoming maintenance operations.

Seanapps allows you to plan your departure with complete peace of mind, ensuring that your boat is always ready to sail. What's more, an integrated alert system notifies you in real time of any potential problems (disconnection of the dock connector, for example). So you'll always know what's going on with your boat.

The application facilitates interaction with your dealer, allowing you to plan and manage servicing and repairs with ease to solutions that are adapted, practical and comfortable...
